TP.Thủ Đức, TP.Hồ Chí Minh

Skills

Languages: C++, JavaScript (ES6+), TypeScript

Frontend(Basic): ReactJS, HTML5, CSS3, Tailwind CSS.

Backend: Node.js, Express.js, JWT

Databases & ORM: PostgreSQL, MongoDB, Prisma.

Tools & Devops: Docker, Git, Postman

- Soft skills: Problem-solving, logical thinking, teamwork

Projects

Wordle Mini-Game with Custom Auth System

Timeline: 08/2025 – 10/2025 | Role: Backend Developer

(Collaborative Project) (Team Project of 2 members)

- Developed the entire backend architecture, core game logic, and API integration for a Wordle clone application.
- Developed custom middleware for authorization, managing Access and Refresh Tokens to ensure secure session persistence.
- Built RESTful APIs (/login, /me, /refresh) and server-side game logic to prevent client-side manipulation.

Real-time Chat Application | React, Node.js, Socket.io, JWT

Timeline: 11/2025 – 2/2026 (personal project)

- Developed a good-performance real-time chat platform using WebSockets (Socket.io) for instantaneous message delivery and status updates.
- Implemented a secure authentication flow using JWT, including custom middleware to authorize socket connections and RESTful API requests.
- Built message logic, including message persistence, real-time "typing" indicators, and online/offline user tracking.
- Built a modern, responsive UI using React, Tailwind CSS, and Shadcn UI, ensuring a seamless user experience across all devices.

Education

2024 – Present

Major: Software Engineering,

Posts and Telecommunications Institute of Technology (PTIT)

- Bachelor of Software Engineering (Sophomore / 2nd-year Student)
- Expected Graduation: 2029
