TP.Thủ Đức, TP.Hồ Chí Minh

## Skills

Languages: C++, JavaScript (ES6+), TypeScript

Frontend(Basic): ReactJS, HTML5, CSS3, Tailwind CSS.

Backend: Node.js, Express.js, JWT

Databases & ORM: PostgreSQL, MongoDB, Prisma.

Tools & Devops: Docker, Git, Postman

- Soft skills: Problem-solving, logical thinking, teamwork

## Projects

### Project: Wordle Mini-Game

Aug 2025 – Oct 2025

**Position:** Backend Developer

**Project description:** A daily word-guessing game designed to help users learn and practice English vocabulary through interactive hints.

#### Responsibilities:

- Developed the entire backend architecture, core game logic, and API integration for the application.
- Customize middleware for authorization, managing Access and Refresh Tokens.
- Built RESTful APIs and server-side game validation.

**Technical stacks:** Nodejs, React, mongoDB.

### Project: Real-time Chat Platform

Nov 2025 – Feb 2026

**Position:** Backend Developer

**Project description:** A real-time messaging platform designed to connect people, chat instantly, and track online status.

#### Responsibilities:

- Connected websocket for frontend and backend
- Customized middleware for authorization
- Built RESTful APIs and integrated into the frontend
- Separated routes and controllers to handle logic efficiently.
- Implemented axios interceptors to automatically attach authentication tokens to outgoing API requests

**Technical stacks:** React, Node.js, Socket.io, postgresSQL, Prisma

## Education

### 2024 – Present

Major: Software Engineering,

Posts and Telecommunications Institute of Technology (PTIT)

- Bachelor of Software Engineering (Sophomore / 2nd-year Student)
- Expected Graduation: 2029
